Laguna Tools Platinum Series

Laguna Tools introduces the Platinum Series table saw. The saw has a smooth gliding T-square fence along with a precision ground cast iron tabletop for a smooth and accurate cutting experience for the user. Other main features are its oversized cast iron trunions that substantially reduce vibration and allow for extremely accurate cuts even during extreme loads. Standard features include a 3-hp motor, mitre gauge, dado throat plate, 10-in. blade capacity and a 5/8-in. arbor. The power transmission belt is a poly V belt design, which is able to transfer power with less loss and less vibration than any other system on the market today. The steel-enclosed cabinet provides maximum dust control, with a 4-in. dust port.

Manufacturer/Brand Name	Laguna Tools
Model	Platinum Series
Max. Size of Workpiece	50" rip capacity
Max. Workpiece Thickness	3 1/8"
Main Saw HP	3 hp
Scoring Saw HP	N/A

SCM SI 400 Vanguard sliding table saw

SCM Group USA introduces the SI 400 Vanguard sliding table saw. The SI 400 Vanguard is a fully digitally automated solution for today's shops. The Vanguard has a user-friendly software interface for all saw functions. It also includes digital readouts and automated functions to ensure maximum accuracy even with the high speed rip fence moving at 25 m/m. The comfortable programming offers the operator visual assistance on both simple angular cuts and a multitude of advanced angular patterns such as pyramids. The SI 400 Vanguard is the solution for cabinet, display and furniture shops requiring great accuracy and speed as well as those requiring detailed angular cuts. The SI 400 Vanguard features include: five automated axis control for blade height/angle, rip fence and scoring raise and lower; touch-screen PC with simple graphic user interface; rip fence with ball screw movement and THK guides; pivoting crosscut support with LCD digital readouts for stops and angle position; digital parallel cutting device for accurate straight-line cuts; 59-in. rip capacity; 10-ft. stroke; and E-Z dial scoring system from Amana Tool on all SCMI sliding table saws.

Lobo TS-P Series

Lobo introduces the new TS-P series of sliding table saws. This series of saws is available from 5- to 10-ft. sliding table with manual controls up through a fully programmable automated saw. Other standard features include: saw shaft bearings lubricated for life, supported with anti-vibration and noise rubbers; special primers and finish for long-term protection; high accuracy, free movement sliding table without wear resistance; special design double rollers carriage made by aluminum profile; welded cold rolling steel plate base, offering rugged construction; and industrial full power motor for heavy cutting capacity. Lobo's Programmable version provides touch-screen controls for maximum efficiency.

Grizzly Model G0623X

Grizzly Industrial introduces Model G0623X, a 10-in. sliding table saw. The saw features a 5-hp, 220-volt, single-phase motor. The G0623X has a compact footprint at 60" x 27 1/2", yet it has a 78 1/2-in. maximum crosscutting capacity. The 3 1/8-in. scoring blade allows for smooth, tear-out-free cuts. Other features include a 4-in. cabinet mounted dust port and a 2 1/2-in. blade guard mounted dust port. It includes a mitre fence, traditional rip fence and two flip stops for the crosscut fence.
